

RIG 706

easternwell[™]
all together better

General Particulars

This multipurpose drill rig is capable of drilling to a depth of 1000m (NQ), 600m (HQ) and 550m of 99mm chip on both mud and air. It also has the ability to carry out 4" conventional core work to an approximate depth of 450m. The rig and all of its auxiliary and support equipment which includes compressors, mud pumps, boosters, and fuel and water storage are fully mine compliant including fire suppression systems, noise reduction systems, and remote estop systems. The rig carrier and the rigs support truck are late model, low mileage, twin steer twin drive's that are fully mine compliant.

Carrier

Type:	Truck mounted multipurpose rig
Chassis:	Mitsubishi FUSO
Width:	2.50m
Length:	10.29m
Weight:	GMV 31Ton

Rig

Drilling Methods:	Wireline diamond coring (HQ, PQ and NQ); conventional air/mud (chipping); conventional diamond coring (4C)
Model:	McCulloch DR950

Mast

Height (down):	4.40m
Height (up):	12.20m

Specifications

Pushdown:	45kN (4,500kg)
Pullback:	120kN (12,000kg)
Compressor:	Auxiliary – Sullair compressor
Rod Sloop:	Yes

Capacity / Depth

PCD/Hammer/Blade:	550m (99mm)
Diamond Coring:	1000m (NQ), 600m (HQ)
Conventional Coring:	450m (4C)
